

Economics around you

Pick something you can see for yourself. Explain it with one idea from the course.

20 % of your grade

groups of 2–3

one poster, one presenter

E-mails to pkocourek@ub.edu. Idea meetings: in our classroom (Aula 2303) if it is free, otherwise in my office.

Good question

- Why does the *menú del día* cost more near Passeig de Gràcia than in Sants?
- Why did Barcelona–Madrid train fares fall after Ouigo and Iryo arrived?
- Why do the cheapest concert tickets sell out in minutes, then reappear on resale sites at twice the price?

Too big

Inflation in Spain
The housing crisis
Is globalisation good?

Something small and local that you noticed yourself.

How it is marked

The question 25 %

Real, specific, local. You noticed it yourself.

The economics 25 %

One idea from the course, correctly identified and explained in your own words. You do not build a model. One idea used well beats four named.

The evidence 25 %

You went and looked: prices you recorded, a chart from a public source, observations, a short interview. Say what you could not find, and where the idea does not fit.

The poster 25 %

Readable from two metres, not crowded. The presenter can answer questions about it.

On your poster

- ☐ Your question
- ☐ The idea, in your own words, with a diagram
- ☐ Your evidence and where it came from
- ☐ Where the idea does not fit
- ☐ Names, and who did which part
- ☐ AI note, if you used it (a few lines: what you asked, what you did with the answer)

The poster

A2 portrait (42 × 59.4 cm), printed, in colour or not.

Readable from two metres: headings about 60 pt, text at least 24 pt.

Bring it printed on 5 Nov; e-mail the PDF by Wed 4 Nov, 20:00.

On the day

Two rounds: half the groups present in the first hour, the other half in the second, so every presenter also sees the other posters.

One presenter stands by the poster; the whole group answers questions.

Who did what. A signed half-page statement with the poster; an individual mark can move up to one point from the group mark.

AI. Allowed if declared (no transcripts); undeclared use counts as copying.

Passing. You need at least 40 % in the project to pass by continuous assessment.

Questions. pkocourek@ub.edu or office hours, Mondays 12:00–13:00.
