

Quiz 2 — how the class did

12

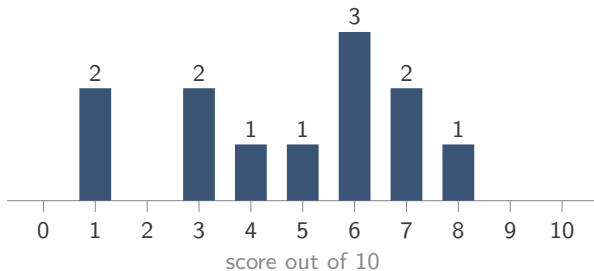

answer strips

4.8

mean score out of 10

5.5

median · range 1–8

Same costs, no gains from trade

Forn Gran has 6 bakers and Forn Petit has 2. In either bakery, one baker makes 40 loaves or 20 cakes a day, and practice does not change this. What can specialisation and trade between the two bakeries achieve?

nothing: their total output cannot rise

 25% (3)

gains for Forn Gran: absolute advantage in both

 0% (0)

gains for both, if each specialises in one good

 33% (4)

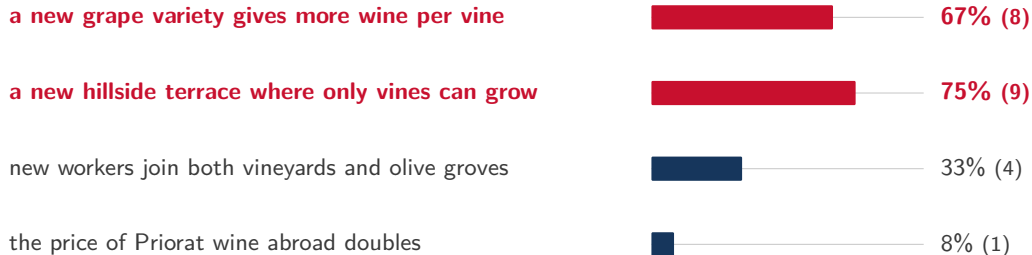

gains only for Forn Petit, the smaller bakery

 33% (4)

1 left it blank

What moved the frontier (select all that apply)

A valley in the Priorat grows grapes for wine and olives for oil. Its frontier moved from "before" to "after". Which events could explain this?

exact set correct: 33% · the shares add to more than 100 %: several circles could be marked

Two frontiers: absolute vs comparative (select all that apply)

Ona and Hugo each design logos and posters for 40 hours a week. The graph shows each one's weekly frontier. Which statements are true?

Ona has an absolute advantage in both goods  75% (9)

Hugo has the comparative advantage in posters  58% (7)

a logo costs Hugo fewer posters than Ona  8% (1)

trade cannot help Ona: she is faster at both  33% (4)

exact set correct: 42% · the shares add to more than 100 %: several circles could be marked · 1 left it blank

Consuming beyond the frontier

In a year, Menorca's workers can make 600 tonnes of cheese or 20 thousand pairs of shoes, or any mix on a straight-line frontier. Menorca makes only cheese and trades 15 tonnes of cheese for each thousand pairs of shoes. How much cheese does it keep if it buys 16 thousand pairs of shoes?

Injectons into the loop (select all that apply)

In Spain's circular flow, money that enters the loop between Spanish households and Spanish firms from outside that loop (from the government, from banks or from abroad) is an injection. Which of these are injections?

a German firm buys parts from a Terrassa factory  **92% (11)**

the Generalitat pays a builder to repair a school  **50% (6)**

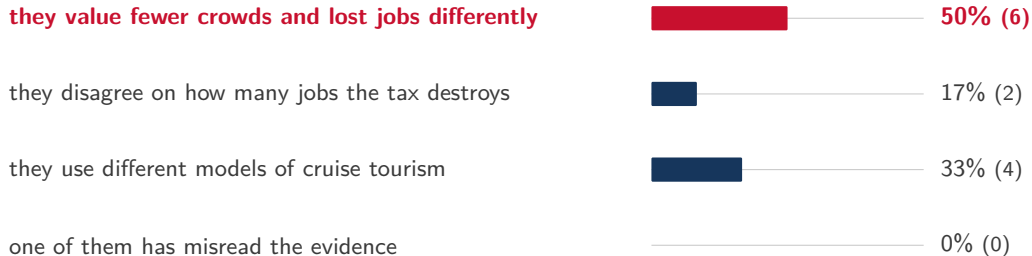

a Girona family buys a car made in Japan  **8% (1)**

a family pays its property tax to the city  **33% (4)**

exact set correct: 42% · the shares add to more than 100 %: several circles could be marked

Same numbers, different advice

Suppose two economists agree on the numbers: a higher tax on cruise passengers in Barcelona would mean 20 % fewer visitors and 500 fewer jobs at the port. One supports the tax; the other opposes it. In the book's terms, why?

The price at which both gain

In a day, a worker in Morocco can grow 40 kg of tomatoes or farm 10 kg of fish; a worker in Norway, 12 kg of tomatoes or 6 kg of fish. Norway sells fish to Morocco and buys tomatoes. At which price do BOTH countries gain?

3 kg of tomatoes for 1 kg of fish

 50% (6)

1 kg of tomatoes for 1 kg of fish

 0% (0)

5 kg of tomatoes for 1 kg of fish

 25% (3)

1 kg of tomatoes for 3 kg of fish

 8% (1)

2 left it blank

Opportunity cost between two points

The Ebro delta's farmland can grow rice or vegetables; the curve is its production possibilities frontier. The delta moves from D to C. What does each extra thousand tonnes of vegetables cost?

1.25 thousand tonnes of rice		58% (7)
0.8 thousand tonnes of rice		17% (2)
10 thousand tonnes of rice		17% (2)
8 thousand tonnes of vegetables		0% (0)
1 left it blank		

Circular flow: land and rent

The diagram is the circular flow of an economy with only households and firms. The Puig family rents its farmland to a wine company. On which arrows do the use of the land and the rent travel?

land on arrow 3, rent on arrow 1

 58% (7)

land on arrow 1, rent on arrow 3

 33% (4)

land on arrow 3, rent on arrow 4

 0% (0)

land on arrow 2, rent on arrow 4

 8% (1)

Which part could data settle

"Barcelona should build more bike lanes, because more bike lanes will cut car traffic." Which part of this sentence could evidence confirm or refute?

that more bike lanes will cut car traffic

that Barcelona should build more bike lanes

neither: a sentence with "should" is an opinion

both, once the new lanes have been built

Hardest three

Same costs, no gains from trade

25% correct

nothing: a cake costs 2 loaves in both shops, so total output cannot rise

most chosen instead: gains for both, if each specialises in one good (33%)

What moved the frontier

33% correct

better grapes, or a new terrace where only vines grow: only the wine end moves

most chosen instead: new workers join both vineyards and olive groves (33%)

Two frontiers: absolute vs comparative

42% correct

Ona has the absolute advantage in both; Hugo the comparative advantage in posters

most chosen instead: trade cannot help Ona: she is faster at both (33%)
