answer strips	mean score	median	range

Score distribution

Per question, % right (select-all: average credit) — hardest first

The three hardest

Question	credit	The answer	Most chosen wrong answer
Same costs, no gains from trade	25%	nothing: a cake costs 2 loaves in both shops, so total output cannot rise	gains for both, if each specialises in one good (33%)
Consuming beyond the frontier	42%	360 tonnes of cheese ($600 - 16 \times 15$)	240 tonnes (42%)
Two frontiers: absolute vs comparative	46%	Ona has the absolute advantage in both; Hugo the comparative advantage in posters	trade cannot help Ona: she is faster at both (33%)

Easiest three: Which part could data settle (75%), Circular flow: land and rent (58%), Opportunity cost between two points (58%)
